

An example showing how ten stables back to back, with a tackroom and washdown area, can be placed in a confined space. The 900mm overhang enables feeding to be carried out under cover, away from the elements.

OAKLEY STABLES

Oakley Stables will gladly help you to decide how best to utilise what space you have to obtain the most out of your stables complex.

With many years experience behind us, Oakley Stables will quote you a competitive, affordable price for a building, whether it be an enclosed yard with archways in and out, or an American barn with everything you need kept inside for those cold wet winter days.

The examples shown here are only a small selection from our range. We also offer a bespoke service to suit your specific needs. Please enquire for further details.

STABLES AND BUILDINGS

Our most popular combination. The standard block of three stables comes complete with front guttering, sliding windows and half lining (12mm ply board). The perfect starter for your yard.

No equine facility is complete without an Oakley Fieldshelter. Whatever size you require, its strong durable construction will ensure it fulfils your needs.

An example of our machinery/tool shed. Being highly versatile and adaptable, it has the advantage of being designed to your specific needs.

We have two standard garages (single and double). However, in accordance with your requirements, there are many possibilities for the design and layout of your garage.

Other areas of expertise include: Clubhouses, summerhouses, offices, driving ranges, tractor sheds, etc.
